Professional Summary

Technology professional with 5+ years of experience building AI systems, VR applications, and digital platforms that address real-world challenges in education, agriculture, and cultural preservation. Combines rigorous technical depth with a strong commitment to social impact — demonstrated through award-winning projects, community leadership across Africa, and work with international gaming and technology organisations. Fluent in English and Japanese; experienced collaborating across multicultural and multinational teams.

KEY SKILL AREAS

- AI/ML: Predictive Analytics, PyTorch, ML pipelines, deep learning for object detection, translation, and code generation.
- VR/AR: Unity XR, Quest 2 optimization, shader graph workflows, immersive menu design.
- Game Development: Unity (C#), gameplay systems, cultural storytelling.
- Software Development: C#, C++, Python, NodeJS, JavaScript, HTML/CSS, Git, agile workflows
- Soft Skills: Team leadership, cross-cultural collaboration, project management, communication.

WORK EXPERIENCE

VR EXPERIENCE ENGINEER

Afrilogic Solutions | June 2024 - present

- Lead developer and designer for Adinkra VR, a cultural rhythm game for the Quest 2
- Built RoboArm VR, an educational VR application for a beginner robotics kit
- Spearheaded VR department strategy and pipeline, establishing best practices for Quest 2 development.
- [Link: Adinkra VR](#)

FEATURE DEVELOPER (EXTERNSHIP)

Maliyo Games — Safari City | August - November, 2025

- Contributed new gameplay features to Safari City, a live-service mobile game by Maliyo Games
- Collaborated with a cross-functional team on feature scoping, implementation, and QA in an agile environment.
- Gained hands-on experience shipping code into a production live-service game with a real player base.
- Co-developed Sweeping Memories, a hyper casual, cosy, cleaning web game.

LEAD PROGRAMMER / CO-GAME DESIGNER

Epic Works | May 2022 - June 2023

- Designed and implemented core systems (game mechanics, battle system, inventory, animations, enemy AI) for 'A Princess Tale' — a published adult RPG.
- Managed the codebase end-to-end: architecture decisions, weekly bug triage, and release management.
- Co-authored the Game Design Document, defining narrative structure, dialogue, and level progression.

EDUCATION

MSC INTELLIGENT COMPUTING SYSTEMS

Ashesi University | 2025 - 2027

- Focus areas: machine learning, deep learning, AI systems, intelligent application development, security, and agile methodologies.
- Projects: ML analytics pipeline, AI-powered agri-marketplace, deep learning tools suite.

BSC PHYSICS

Kwame Nkrumah University of Science and Technology(KNUST) | 2016-2020

- Specialization in Computer Science.
- Courses in OOP with C++, networking, web development technologies and Mechanics.

KEY PROJECTS

ML PIPELINE — STUDENT PERFORMANCE ANALYTICS

Ashesi University MSc Project | 2025

- Designed and built an end-to-end machine learning pipeline to analyse multi-year student academic performance data.
- Applied data preprocessing, feature engineering, and predictive modelling to surface actionable insights for educators.

SMARTAGGRO — AI-POWERED AGRI-MARKETPLACE

| Ashesi University MSc Project | 2025

- Co-developed a digital marketplace enabling direct farmer-to-consumer trade across Ghana.
- Integrated an AI-powered farming assistant providing personalised crop recommendations and agricultural guidance.
- Designed for social impact: reducing middlemen margins and improving food security for smallholder farmers.

VR SUPERMARKET — PHD PROJECT

Contract project for Dr Gilbert Mombazaa. | 2024

- Developed a full VR Supermarket simulation as the core application for a PhD research study.
- Built a supplementary VR companion app designed to onboard participants with no prior VR experience, ensuring research validity across a diverse test group.

VOLUNTEER EXPERIENCE

EVENT COORDINATOR

NerdCon Expo Accra | 2018 - present

- ICore organiser of Ghana's premier animation, gaming, and technology convention since 2018.
- Managed event scheduling, vendor coordination, sponsorship logistics, and venue setup.

CELL LEAD & MENTOR

Africa GameUp Boot Camp (Maliyo × Google) | 2021 - 2022

- Mentored emerging African game developers, guiding them from concept to a published Play Store project.
- Led a multinational team, coordinating across time zones to deliver a completed game prototype.
